

Liver conditions overview

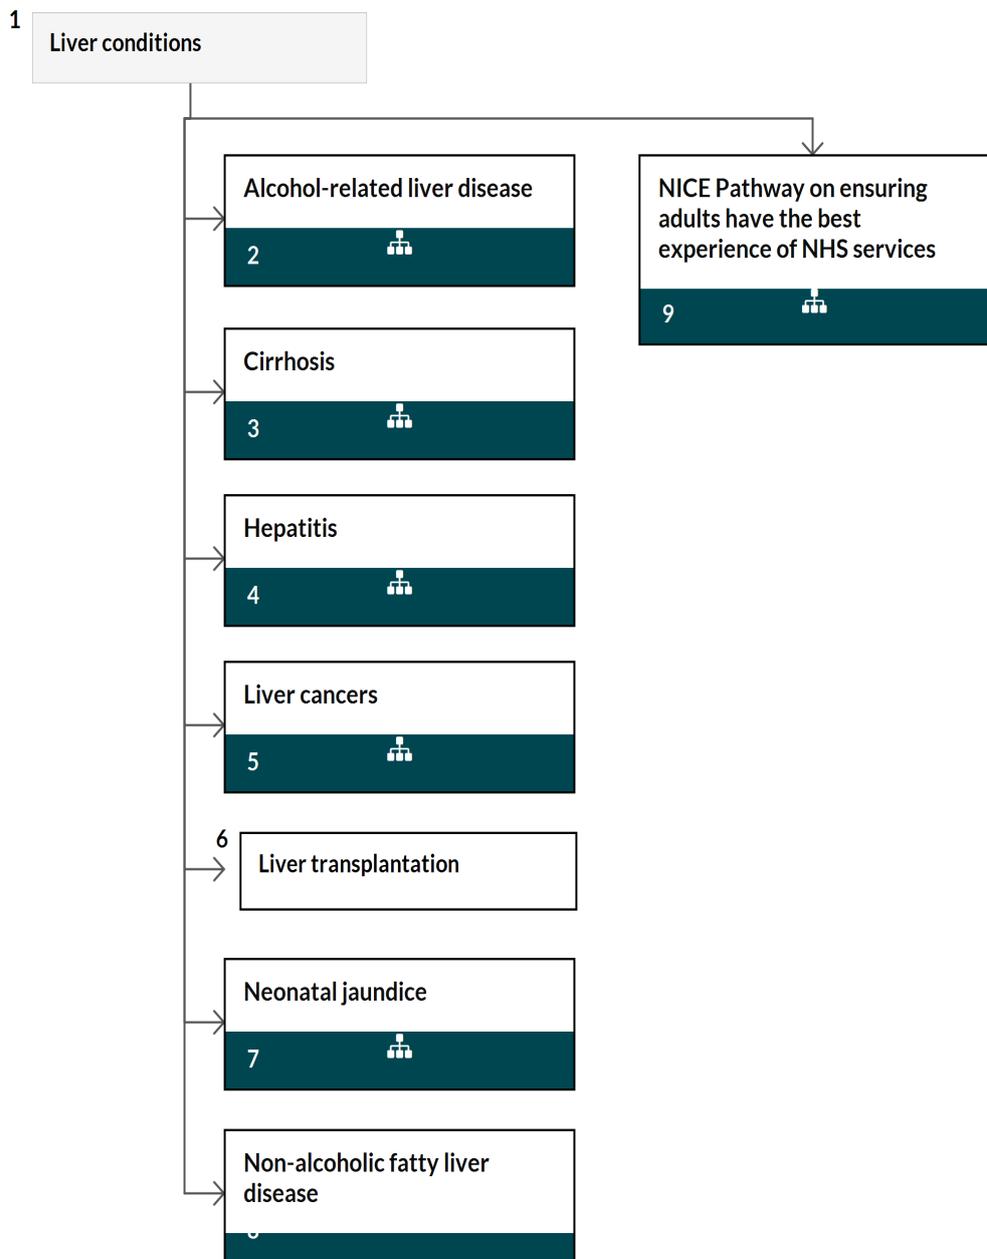

NICE Pathways bring together everything NICE says on a topic in an interactive flowchart. NICE Pathways are interactive and designed to be used online.

They are updated regularly as new NICE guidance is published. To view the latest version of this NICE Pathway see:

<http://pathways.nice.org.uk/pathways/liver-conditions>

NICE Pathway last updated: 04 November 2020

This document contains a single flowchart and uses numbering to link the boxes to the associated recommendations.

1 Liver conditions

No additional information

2 Alcohol-related liver disease

[See Alcohol use disorders/alcohol-related liver disease](#)

3 Cirrhosis

[See Cirrhosis](#)

4 Hepatitis

[See Liver conditions / Hepatitis](#)

5 Liver cancers

[See Liver cancers](#)

6 Liver transplantation

Everolimus

The following recommendations are from [NICE technology appraisal guidance on everolimus for preventing organ rejection in liver transplantation](#).

Everolimus is not recommended within its marketing authorisation for preventing organ rejection in people having a liver transplant.

People whose treatment with everolimus was started within the NHS before this guidance was published, should be able to continue everolimus until they and their NHS clinician consider it appropriate to stop.

NICE has written [information for the public on everolimus](#).

Living-donor liver transplantation

NICE has published [interventional procedures guidance on living-donor liver transplantation with normal arrangements](#) for clinical governance, consent and audit, providing the necessary regulatory requirements are followed (see guidance for details).

NICE has published [interventional procedures guidance on ex-situ machine perfusion for extracorporeal preservation of livers for transplantation with special arrangements](#) for clinical governance, consent, and audit or research.

LiMAx system for assessing the functional capacity of the liver

NICE has published a [medtech innovation briefing on LiMAx system for assessing the functional capacity of the liver](#).

7 Neonatal jaundice

[See Neonatal jaundice](#)

8 Non-alcoholic fatty liver disease

[See Non-alcoholic fatty liver disease](#)

9 NICE Pathway on ensuring adults have the best experience of NHS services

[See Patient experience in adult NHS services](#)

Your responsibility

Guidelines

The recommendations in this guideline represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, professionals and practitioners are expected to take this guideline fully into account, alongside the individual needs, preferences and values of their patients or the people using their service. It is not mandatory to apply the recommendations, and the guideline does not override the responsibility to make decisions appropriate to the circumstances of the individual, in consultation with them and their families and carers or guardian.

Local commissioners and providers of healthcare have a responsibility to enable the guideline to be applied when individual professionals and people using services wish to use it. They should do so in the context of local and national priorities for funding and developing services, and in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities. Nothing in this guideline should be interpreted in a way that would be inconsistent with complying with those duties.

Commissioners and providers have a responsibility to promote an environmentally sustainable health and care system and should [assess and reduce the environmental impact of implementing NICE recommendations](#) wherever possible.

Technology appraisals

The recommendations in this interactive flowchart represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, health professionals are expected to take these recommendations fully into account, alongside the individual needs, preferences and values of their patients. The application of the

recommendations in this interactive flowchart is at the discretion of health professionals and their individual patients and do not override the responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or their carer or guardian.

Commissioners and/or providers have a responsibility to provide the funding required to enable the recommendations to be applied when individual health professionals and their patients wish to use it, in accordance with the NHS Constitution. They should do so in light of their duties to have due regard to the need to eliminate unlawful discrimination, to advance equality of opportunity and to reduce health inequalities.

Commissioners and providers have a responsibility to promote an environmentally sustainable health and care system and should assess and reduce the environmental impact of implementing NICE recommendations wherever possible.

Medical technologies guidance, diagnostics guidance and interventional procedures guidance

The recommendations in this interactive flowchart represent the view of NICE, arrived at after careful consideration of the evidence available. When exercising their judgement, healthcare professionals are expected to take these recommendations fully into account. However, the interactive flowchart does not override the individual responsibility of healthcare professionals to make decisions appropriate to the circumstances of the individual patient, in consultation with the patient and/or guardian or carer.

Commissioners and/or providers have a responsibility to implement the recommendations, in their local context, in light of their duties to have due regard to the need to eliminate unlawful discrimination, advance equality of opportunity, and foster good relations. Nothing in this interactive flowchart should be interpreted in a way that would be inconsistent with compliance with those duties.

Commissioners and providers have a responsibility to promote an environmentally sustainable health and care system and should assess and reduce the environmental impact of implementing NICE recommendations wherever possible.
